

This form should be used for all taxonomic proposals. Please complete all those modules that are applicable (and then delete the unwanted sections).

For guidance, see the notes written in blue and the separate document "Help with completing a taxonomic proposal"

Please try to keep related proposals within a single document; you can copy the modules to create more than one genus within a new family, for

example.

MODULE 1: **TITLE, AUTHORS, etc**

Code assigned:	<i>2015.025aB</i>	(to be completed by ICTV officers)				
Short title: To rename all (523) existing bacterial virus and 2 archaeal virus species (e.g. 6 new species in the genus <i>Zetavirus</i>)						
Modules attached (modules 1 and 10 are required)	1 <input checked="" type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	4 <input type="checkbox"/>	5 <input type="checkbox"/>	
	6 <input type="checkbox"/>	7 <input type="checkbox"/>	8 <input type="checkbox"/>	9 <input type="checkbox"/>	10 <input checked="" type="checkbox"/>

MODULE 8: **RENAME**

Use this module to change the name of one or more existing taxa (but note that stability of nomenclature is encouraged wherever possible). Insert extra lines in the table if needed.

Renaming one or more taxa

Code	2015.025aB	<small>(assigned by ICTV officers)</small>
To rename the following taxon (or taxa):		

Reasons to justify the renaming:

Explain why the taxon (or taxa) should be renamed

The naming of “phage” taxa has been problematic in the past and led to multiple inconsistencies, partially in contradiction to the ICVCN. This proposal addresses several of these inconsistencies:

We propose to:

- (a) replace the species name component “*phage*” with “*virus*” in recognition of the fact that phages are viruses;
- (b) replace collective species name component nouns, such as “*Pseudomonad*,” “*Endosymbiont*,” and “*Enterobacteria*” with the more accurate original bacterial host genus name.
- (c) employ a consistent use of “*phi*”, and where there is no historical reason for its presence in the name, it has been deleted.
- (d) accurately follow ICVCN rules and to capitalize the species component since it represents a proper noun.
- (e) remove the bacterial species name from virus species names.
- (f) remove hyphens from the virus species names in accordance with the ICVCN rule 3.13. N.B. Hyphens between two numbers or two letters were retained to avoid confusion and loss of encoded information.

Current species name	Proposed species name	Comment
order <i>Caudovirales</i>		
<i>Acinetobacter phage 133</i>	<i>Acinetobacter virus 133</i>	
<i>Actinomyces phage Av-1</i>	<i>Actinomyces virus Av1</i>	Removed hyphen
<i>Aeromonas phage 25</i>	<i>Aeromonas virus 25</i>	
<i>Aeromonas phage 31</i>	<i>Aeromonas virus 31</i>	
<i>Aeromonas phage 43</i>	<i>Aeromonas virus 43</i>	
<i>Aeromonas phage 44RR2.8t</i>	<i>Aeromonas virus 44RR2</i>	Removed .8t
<i>Aeromonas phage 65</i>	<i>Aeromonas virus 65</i>	
<i>Aeromonas phage Aeh1</i>	<i>Aeromonas virus Aeh1</i>	
<i>Aeromonas phage phiO18P</i>	<i>Aeromonas virus phiO18P</i>	Retained <i>phi</i> (historical)
