phytovirus

Offline [AMOAKON](#) 160.154.150.136 [over 2 years ago](#)

Bonjour chers Tous,

Je voudrais avoir le nombre précis d'espèces, de famille et de genre des virus qui infectent les plantes, selon le 10 ieme Rapport.

Je ne sais comment procéder sur le site pour avoir ces informations. Prière de bien vouloir m'aider. Merci bien

Dear Amoakon,

There are 36 families, 158 genera and 1791 species in the current Master Species List, if you filter for plants, plants/invertebrates and plants/fungi as hosts. The easiest way to access this data is from the Virus Metadata Resource. You can easily count the taxa in the Excel spreadsheet, manually or using pivot tables.

Regards

Dear Elliot Lefkowitz,

Thank you very much for this link because I think I downloaded the right file now.

best regards
