

This form should be used for all taxonomic proposals. Please complete all those modules that are applicable (and then delete the unwanted sections). For guidance, see the notes written in blue and the separate document "Help with completing a taxonomic proposal"

Please try to keep related proposals within a single document; you can copy the modules to create more than one genus within a new family, for example.

MODULE 1: **TITLE, AUTHORS, etc**

Code assigned:	2011.003aB	(to be completed by ICTV officers)			
Short title: Rename the two species in the genus "PhiKMV-like viruses" (proposed name <i>Phikmvlikevirus</i>) (e.g. 6 new species in the genus <i>Zetavirus</i>)					
Modules attached (modules 1 and 9 are required)	1 <input checked="" type="checkbox"/> 6 <input type="checkbox"/>	2 <input type="checkbox"/> 7 <input type="checkbox"/>	3 <input type="checkbox"/> 8 <input checked="" type="checkbox"/>	4 <input type="checkbox"/> 9 <input type="checkbox"/>	5 <input type="checkbox"/>

Author(s) with e-mail address(es) of the proposer:

Mike Adams (mike.adams@bbsrc.ac.uk)
Rob Lavigne (rob.lavigne@biw.kuleuven.be)

List the ICTV study group(s) that have seen this proposal:

A list of study groups and contacts is provided at <http://www.ictvonline.org/subcommittees.asp> . If in doubt, contact the appropriate subcommittee chair (fungal, invertebrate, plant, prokaryote or vertebrate viruses)

Prokaryote SC

ICTV-EC or Study Group comments and response of the proposer:

Date first submitted to ICTV:

Date of this revision (if different to above):

MODULE 8: **NON-STANDARD**

Template for any proposal not covered by modules 2-7. This includes proposals to change the name of existing taxa (but note that stability of nomenclature is encouraged wherever possible).

non-standard proposal

Code	2011.003aB	(assigned by ICTV officers)
Title of proposal: Rename the two species in the genus “PhiKMV-like viruses” (proposed name <i>Phikmvlikevirus</i>)		

Text of proposal:

Change the names of the following two species in the genus “PhiKMV-like viruses”:
Enterobacteria phage phiKMV to *Pseudomonas phage phiKMV*;
Enterobacteria phage LKA1 to *Pseudomonas phage LKA1*.

Reasons to justify the proposal:

The genus ‘PhiKMV-like viruses’ (subfamily *Autographivirinae*, family *Podoviridae*, order *Caudovirales*) and two species were created by proposal 2007.110-114B. The species were named *Enterobacteria phage phiKMV*, and *Enterobacteria phage LKA1* and this is how they appear in the MSL. These were proposed (and ratified) in error and they should have been named *Pseudomonas phage phiKMV*, and *Pseudomonas phage LKA1*, respectively. The correct names reflect the host bacterium and are also consistent with the literature and information in the sequence accessions
