Old Taxonomic Order

Order	*Picornavirales*
Family	*Sequiviridae*
Genus	2

New Taxonomic Order

Order	*Picornavirales*
Family	*Secoviridae* (proposed)
Genus	2

ICTV-EC comments and response of the SG

Argumentation to remove the family:

This proposal is part of a series to revise the taxonomy of the plant-infecting members of the proposed order *Picornavirales*. This involves placing the genera *Comovirus, Fabavirus, Nepovirus, Sequivirus, Waikavirus, Cheravirus, Sadwavirus* and the proposed genus *Torradovirus* into a new, larger, family *Secoviridae* that would then be divided into subfamilies. The present family *Sequiviridae* would disappear in this re-arrangement. See the *Secoviridae* family proposal for further details.
