Old Taxonomic Order

Order	*Picornavirales*
Family	*Comoviridae*
Genus	3

New Taxonomic Order

Order	*Picornavirales*
Family	*Secoviridae* (proposed)
Subfamily	*Comovirinae* (proposed)
Genus	3

ICTV-EC comments and response of the SG

Argumentation to remove the family:

This proposal is part of a series to revise the taxonomy of the plant-infecting members of the proposed order *Picornavirales*. This involves placing the genera *Comovirus, Fabavirus, Nepovirus, Sequivirus, Waikavirus, Cheravirus, Sadwavirus* and the proposed genus *Torradovirus* into a new, larger, family *Secoviridae*. The genera currently classified in the family *Comoviridae* would be assigned to a new subfamily *Comovirinae*. See the *Secoviridae* family proposal for further details.
